Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 6, 7, & 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 63-247655.

JP 63-247655 discloses a method to measure halogen concentration comprising introducing a fluorine gas into a potassium iodide containing column to liberate iodine; using a LED light source to irradiate the combination; and calculating the concentration of fluorine from the quantity of iodine liberated. JP 63-247655 does not disclose that the process is discontinuous, so it is presumed that the method is continuous.

JP 63-247655 differs from the claimed invention in that it does not disclose the use of metal iodide-containing solution, rather a metal iodide-containing solid. However, it is well known and appreciated that many chemical reactions can be translated from dry to wet chemistry and vice versa. Thus, it would have been obvious to one of ordinary skill in the art after reading the JP 63-247655 disclosure to modify the method by using a metal iodide-containing solution instead of the metal iodide-containing column, absent any evidence to the contrary.

Allowable Subject Matter

3. Claims 2-5 & 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
